GREW A TEAM

Unity / C# developer, 6+ years in gamedev — mobile and PC projects from prototypes to live services with millions of players. Strong hands-on engineering across gameplay systems, multiplayer (client-server) and mobile optimization; experience in large codebases on ECS/DOTS (800K+ lines). Team-lead experience — grew a team from 0 to 8, code review, mentoring. I use AI agents (Claude Code, Codex) with strict review — speed without sacrificing engineering quality.

EXPERIENCE

Jun 2026 —

Present

St. Petersburg, Russia
· Remote

Unity Developer **Reaction Games**

Days After — mobile survival action-RPG (10M+ installs), published with MY.GAMES. Liveops.

- Product development in C#/Unity3D: support and new features, mobile UI, game content (Addressables).

🔗 [Days After](#)

Jan 2026 —

Present

Riga, Latvia

Senior Unity Developer **PART-TIME** · **Quantum Gear Studios**

Forsaken Kingdom — dark fantasy roguelite auto-battler / RPG for PC (Steam, in development).

- Sole programmer on the team: full technical ownership of the entire codebase; design all game systems from scratch against the GDD.
- Real-time combat, stats, effects, skills; meta, squad and camp management, progression, builds.

🔗 [Forsaken Kingdom](#)

Feb 2026 —

Jun 2026

Astana, Kazakhstan

Lead Unity Developer · **Taptap Studio**

Mafia Stories: Idle Tycoon — mobile idle tycoon (F2P, Android).

- Took over the project in an unstable state (built on top of another + vibe-code from the designer): staged refactor, stabilized core systems, shipped two content releases in parallel.
- Led a team of 3 (later 2) programmers; built engineering culture from scratch: code style, git workflow, reviews, tests, release planning.
- Introduced agentic development (Claude Code, Codex) with strict review; accelerated feature delivery while maintaining quality and control over the codebase.

Oct 2023 —

Jan 2026

St. Petersburg, Russia

Unity Developer **Reaction Games**

Dead Impact — co-op action-RPG (zombie survival) on ECS/DOTS. Self-published, 500K+ installs. Codebase >800K lines, dev team of 8.

- Gameplay systems: unit parameters, class progression, stats, location ranks, adaptive difficulty, legendary weapons, effect synchronization.
- Client-server architecture, Event Sourcing, performance profiling and optimization; refactoring, unit tests, data migrations, UI, analytics.

Apr 2023 —
Oct 2023
Izhevsk, Russia

● **Lead Unity Developer** TECH LEAD **Black Games**

Last Wish — interactive 3D PC visual novel (Steam, VK Play) with an Udmurt narrative.

- Full technical ownership: architecture, core systems, release pipeline; dynamic scenes, QTE, professional voice-over, lip-sync, branching dialogue.
- Released on Steam and VK Play; finalist of the "Start Game" accelerator (VK 1M-impressions prize), conference awards.

Jun 2020 —
Apr 2023
Izhevsk, Russia

● **Unity Developer → Team Lead** **Black Games**

Stream of HyperCasual / Hybrid Casual prototypes for Android, iOS.

- Joined as the first developer; built the dev department from scratch and led a team of up to 8 programmers (hiring, onboarding, mentoring, code review, sprint planning).
- Internal tools and templates to speed up development. Result: 200+ prototypes, releases with millions of installs — e.g., Car Junk Resurrection (1M+).
